All readers will come away with the confidence to move forward wisely and a strong sense of why publishing matters today more than ever.

*Growth and Mineral Nutrition of Field Crops* Feb 10 2022 By the year 2050, the world's population is expected to reach nine billion. To feed and sustain this projected population, world food production must increase by at least 50 percent on much of the same land that we farm today. To meet this staggering challenge, scientists must develop the technology required to achieve an "evergreen" revolution-one
